**DETAILED ACTION**

***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Claim Objections***

2. Claims 1, 2, 5, 6 and 7 are objected to because of the following informalities:  
  
Claim 1, there are lack of antecedent basis for "the other surface" on line 3, "the one of them" on line 4, "the light emitting side" on line 8, and "the visual recognition side" on line 9. "its" on line 3 and "that" on line 11 should be changed to what they refer.  
  
Claim 2, "that" on line 2 should be changed to what it refers.  
  
Claims 5 and 6, is the "a light emitting means" different from the "a light emitting means" in claim 1 line 4?  
  
Claim 7, is the "a light emitting means" on line 2 different from the "a light emitting means" in claim 1 line 4? "its" on line 8 and "that" on line 13 should be changed to what they refer.  
  
Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Masuda et al. [US 6,340,999].

Regarding claim 1, Masuda et al. disclose a LCD having a light pipe [3] with light emitting means [3c], a light source [2], a liquid crystal display panel [5] with a reflective layer [7] and an adhesive layer [10a] having a refractive index [1.38] lower than a refractive index [1.49] of the light pipe [3] (figures 1 and 10, column 10 lines 50-65, column 11 lines 50-54, column 15 lines 25-39, column 16 lines 23-28).

Regarding claim 2, Masuda et al. disclose a refractive index [1.38] of the adhesive layer [10a] and a refractive index [1.49] of the light pipe [3] (figures 1 and 10, column 11 lines 50-54, column 16 lines 23-28).

Regarding claims 3 and 4, Masuda et al. disclose the adhesive layer [10a] having a full light transmittance of 90% or more, or its haze value of 10% or less (column 16 lines 23-28).

Regarding claim 5, Masuda et al. disclose the light pipe [3] having a light emitting means [3c] on the upper surface and an emitting light from the lower surface [the surface contact with layer 10, 10a] having a direction within 30 degrees from the reference plane of the lower surface (figures 1 and 10).

Regarding claim 6, Masuda et al. disclose the light pipe [3] having a light emitting means [3c], which composes of a plurality of asperities triangular [3f] with a tile angle [from a reflective portion 3e] of 35 – 48 degrees (figures 1 and 10).

Regarding claim 7, Masuda et al. disclose the light pipe [3], a light emitting means being a structure of prism-like asperities [3c] arranged at pitches of 390  $\mu\text{m}$ , a reflective portion [3e] tilt angle of 35-48 degrees, a length of the reflective portion [3e] being 20  $\mu\text{m}$ , a propagation portion [3d] tilt angle of 0 – 10 degrees, a length of the propagation portion [3d] being 370  $\mu\text{m}$  (figures 1 and 10, column 11 lines 1-23).

Regarding claim 8, Masuda et al. disclose the asperities [3f] having ridges [3e] with in a range of  $\pm 30$  degrees (figures 1 and 10, column 11 lines 1-23).

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bao Q. Truong whose telephone number is (703) 308-6452. The examiner can normally be reached on Monday-Friday (8:00 AM - 4:00 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sandra L. O'Shea can be reached on (703) 305-4939. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308 0956.
